DETAILED ACTION

1. Claims 1-23 are in the case.

2. *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2-8, drawn to compounds wherein R3 is piperidine, classified in class 546, subclass 197. If this group is elected, generic claims 1, 9-19 can be prosecuted together with the elected compounds to the extent that R3 is piperidine.
- II. Claims 1, 9-19, drawn to compounds wherein R3 is morpholine, classified in class 544, subclass 105.
- III. Claims 1, 9-19, drawn to compounds wherein R3 is pyrrolidinyl, classified in class 548, subclass 465.
- IV. Claims 1, 9-19, drawn to compounds wherein R3 is nonheterocyclic, classified in class 549, subclass 399.
- V. Claims 20-23, drawn to method of treating cancer, classified in class 514, subclass various, depending on species election. If this group is elected, a further election of a single disclosed cancer and a single disclosed compound for treating the elected cancer is also required.

The inventions are distinct, each from the other because of the following reasons:

Groups I-IV compounds are independent and distinct because the core structure has been evidenced not to be the substantial structure for the common utility since similar core with different substituents are known for entirely unrelated utility, i.e. see X is nitrogen compounds (CA 126) for treating arteriosclerosis while X is SO₂ compounds (CA 99) are useful for PCA inhibition. Groups I-IV compounds thus differ in elements, chemical bonding and chemical properties to such an extent that a reference anticipating one group would not render another group obvious. Further, the classification for each group are not coextensive of each other and separate searches must be conducted.

Inventions I-IV and V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product such as evidenced by Ito US 4,960,908.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Should applicant traverse on the ground that the groups are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the groups to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
